

How Does *MF. Ionic Silver Solution* Work?

According to medical journals from around the world, it disables the particular enzyme that all one-celled bacteria, fungi and viruses use for their oxygen metabolism - its chemical lung. Our Ionic Silver Solution co-mingles with the blood and enters the cells to seek out and destroy harmful organisms. Within minutes after the initial contact, the pathogen suffocates and dies. Then it is cleared out of the body by the immune, lymphatic and elimination systems. Thus our product is absolutely non-toxic and safe for humans, animals, plants and all multi-celled living matter. The body does not build up a tolerance to it and studies show that Ionic Silver Solution does not form silver deposits within the body.

MF. Ionic Silver Solution for Burn Victims:

The come back of silver in medicine began in the 1970's. The late Dr. Carl Moyer, chairman of Washington University's Department of Surgery, received a grant to develop better treatment for burn victims. Dr. Harry Margraf of St. Louis, as the chief biochemist, worked with Dr. Moyer and other surgeons to find an antiseptic strong enough, yet safe enough to use over large areas of the body.

Dr. Margraf reviewed 22 antiseptic compounds and found drawbacks in all of them. He noted that many of these antibiotics were ineffective against a number of harmful bacteria, including the biggest killer in burn cases, a bacterium called *Pseudomonas Acuginose*. Extensive trials proved silver to be the most effective antibiotic. It is being used in all major burn centers throughout North America. Once the discovery was made that the body's chief fluids were colloidal in nature, the endless possibilities which could occur from the use of colloids in medicine were recognized. "What we actually have done, was rediscover that silver kills bacteria" stated Dr. Robert Becker, M.D. "**It is nontoxic in micro-concentrations of 3 to 6 parts per million.**" The British Medical Journal reports that it rapidly subdues inflammation and promotes healing. Dr. Robert Becker noticed a correlation between low silver levels and sickness; colds, flu, etc.

Dr. Bjorn Nordstrom of the Karolinska Institute in Sweden has used silver in his cancer treatment for many years. He says it has brought on rapid remission in many patients whom other doctors had given up on.

ADULTS: 2 teaspoons throughout the day. Hold under tongue 1 to 2 minutes before swallowing. For chronic infection of virus or disease, take one teaspoon every 3 hours until infection has gone. Then continue with maintenance dosage 3 weeks on, 1 week off. **Never dilute or mix with water or any fluids, but you may drink or eat before or after taking dosage.**

YOUTH 12 & older: ½ teaspoon, 2 times per day.

NOTE: Hold the full strength dosage under the tongue for faster & stronger action.

After ingesting the initial dosages of *M.F.I.S. Solution* one might experience a brief detox effect such as a sluggish feeling, mild, headaches, or mild diarrhea. If these symptoms appear, this is a positive sign that the product is WORKING. Dead pathogens are accumulating and need to be expelled. If you experience discomfort, reduce the dosage of *M.F.I.S. Solution* temporarily and then gradually increase as symptoms subside. Tailor the dosage to the needs of your body.

Application: *M.F.I.S. Solution* can be very effective on cold sores, cosmetic burns, athlete's foot, warts, pimples and other skin disorders. Moisten cotton swab with our **Ionic Silver Solution** and compress the cotton swab on the infected area for a minimum of 10 minutes per treatment. Apply 3 times a day and increase/decrease frequency as needed. Tailor the dosage to relieve the symptoms. On boils, warts and cold sores apply a saturated cotton ball over the desired area. Also spraying the infection area or use eye dropper directly on gauze or bandage pad. Can be extremely effective. You will be amazed on how fast your infection will heal.

ATTENTION: (Facial, Acne & Renewal) Cleanse & pat dry; spray on & let air dry. See & feel the difference.

**For professional use only
STORES**

Keep stored in a cool dark area

Mission Falls Ionic Silver Solution (M.F.I.S.) is a pure solution of Sub-Atomic Silver Ions making it the most powerful and bio-available form of Silver on the market today! *M.F.I.S. Solution* contains 99.9% silver ions in a soluble state and are 400 times smaller than your red blood cells allowing them to easily pass **through** cell membranes where viruses reside!

Most antibiotics kill only six or seven different disease-causing organisms, but **silver** is known to kill as many as 650 of these organisms. This includes bacteria, fungi, yeasts, viruses and parasites. These micro-organisms are suffocated rather than poisoned which prevents resistant strains from mutating. This process is accomplished within minutes.

M.F.I.S. Solution, contains a solution of silver ions thousands of times smaller than non-ionic Colloidal Silver in turn delivering a superior inter-cellular transport process.

Attention: 2 teaspoons per day is the maintenance program. When on the maintenance program take for 3 weeks then one week off. You want to go off the ionic for a week to allow your naturally occurring “good” bacteria to propagate itself further. Take a pro-biotic [acidophilus] when taking the ionic silver. Most health stores carry pro-biotic & it does not have to be an expensive choice, also try to have yogurt in your diet if possible.

History of Ionic Silver

Interest in Ionic Silver has increased recently, in part because illness causing organisms do not build up a resistance to Ionic Silver the way they do to other conventional antibiotics. Antibiotics become less effective as resistance to them grows.

The properties of silver have been known for millennia. In ancient civilizations, the wealthy would store their water in silver vessels to keep bacteria from growing. Roman soldiers were known to put a silver coin in their mouths to prevent sickness. American settlers often put a silver dollar in milk containers to delay its spoilage.

Why Silver?

Silver is a natural element and occurs as a trace mineral in the soil. It is one of the essential trace minerals required by plants, animals and humans. Doctors have long connected silver with our body's natural defense system.

What is a Colloid?

A Colloid is a “suspension of one material in another.” In the case of Colloidal Silver, it is solid particles (of silver) in a liquid (water).

What is an Ion of Silver?

*An Ion of Silver is an atom missing one or more electrons. It has distinctly different properties than a particle of silver has and is actually in a soluble state and thus not colloidal. **M.F.I.S.** ions carry a positive electrical charge, creating a shortage of one or more electrons per ion, in turn creating silver ions that are very bio-active. The sizes of silver colloids or ions are typically measured in nanometers (nm). **A nm is one millionth of a millimeter.** Most Colloidal Silver sold today has silver particles ranging from 10 to 1000 nm. There are approximately 4.5 million silver ions in one nm.

Is M.F.I.S. a Colloidal Silver?

Answer: No...it is an Ionic Silver Solution in a non-colloidal soluble state.

“It is the missing electron of a Silver Ion that provides the ‘killing power’, targeting viruses and bacterium!”

Is M.F. Ionic Silver Solution less effective with 6 PPM as opposed to non-ionic Colloidal Silver products produced with 20 PPM?

Answer: No...PPM is a measure of “parts by weight”. In the case of colloidal silver, one part per million is equal to 1 milligram of silver per liter of water. PPM is a misleading reference many use in determining the effectiveness of silver being transported to your cells. To explain this, a silver dime weighing 1000 milligrams could be placed in a liter of water, which would give you a particle size of approximately 1,000 PPM. Whether you were to swallow the dime whole (“Not advised!”) or grind it up into 1.000 or 1,000,000 tiny pieces, the amount of silver in the liter of water would remain 1,000 PPM. If you keep grinding this dime into smaller and smaller pieces of silver they eventually would qualify in size as a colloid which would be silver particles ranging anywhere from 1 to 1000 nm, These silver colloids would have very few ions resulting in a low bio-activity. Therefore they would be relatively ineffective towards the killing of viruses and other pathogens inside your cells.

The largest allowed colloidal particle of 1,000 nm contains about 45 billion ions of silver.

Think of your silver ions as silver bullets shooting at an army of unfriendly bacteria (**M.F. Ionic Silver Solution** is not damaging to friendly bacteria). Would you rather be defended with one fat cannonball being fired at the enemy or 45 million bullets? Ionic silver solution cannot be produced in a high PPM due to the limited solubility of silver ions in water. **M.F. Ionic Silver Solution** is produced with 99.99+ pure silver in ionized water with a positive electrical charge within the ideal range of 6 PPM ultimately producing a 99%+ makeup of silver ions.

Internal Disease: M.F. Ionic Silver Solution has been used against hundreds of different health disorders such as:

• colds, sore throats & flu	• swollen prostate
• pneumonia	• yeast infections
• children's ear infections	• cold sores and cankers
• hepatitis	• chronic fatigue
• ulcers	• bladder infections
• lyme disease	• hemorrhoids
• gonorrhea	• herpes, syphilis

Now available in a convenient Topical Application Spray. Mission Falls Ionic Silver Solution has been used successfully on:

• burns	• cuts & scrapes
• psoriasis	• athletes foot
• poison oak	• rashes and eczema
• acne and warts	• pink eye
• sunburn	• diaper rash

Dental Hygiene

- pyorrhea and bad breath, receding gums and gingivitis
- bleeding gums and more...

Other Known Uses

After several decades of clinical use, silver has been effective in the treatment of burns and for eye, ear, nose, throat, vaginal, rectal and urinary tract infections. Silver has been prescribed in medicine as an aid to the brain, reproductive disorders in women and the circulatory system. It has been used as a remedy for mental imbalances, sleepwalking and anorexia nervosa.

Additional uses include the treatment of allergies, anthrax bacilli, arthritis, parasites, blood poisoning, boils, wounds of the cornea, cerebrospinal meningitis, candida, cholera, colitis, cystitis, diabetes, diphtheria, dysentery, enlarged prostate, hepatitis, infantile diseases, lesions, leukemia, lupus, rheumatism, ringworm, shingles, skin cancer, staph and strep infections, stomach flu, thyroid conditions, tonsillitis, toxemia, stomach ulcers, acne, warts, food poisoning, and whooping cough. Tests prove, due to the absorption of silver in the small intestine, the friendly bacteria in the large intestine are not affected.

THIS PRODUCT IS EQUALLY EFFECTIVE ON PETS AND LIVESTOCK.

GELS

Mission Falls TM

Premium Ionic Silver Gel

is a compound of Ionic Silver, De-Ionized Water, Carbomer and Triethanolamine Gelling Agent. For very effective use on burns and skin infections. Apply gel to infected area and rub in for absorption or apply to bandage.
